EXPERIENCE

Software Developer | Seansoft Corporation

Makati, Philippines | Jan 2024 – Apr 2026

- Contributed to a complex [mineral management platform](#), collaborating closely with other engineers.
- Migrated a large legacy AngularJS codebase to React, improving maintainability and performance.
- Optimized the Leaflet map performance by removing unused markers and layers, boosting UI responsiveness.
- Built reusable and responsive React + Bootstrap UI components, improving consistency across the product.
- Created and improved Django API endpoints, with strong validation and reliable data handling.
- Improved audit logging by migrating a custom system to database-level audit logs.
- Implemented Cypress E2E and unit tests to prevent regression in key features.
- Improved security by updating dependencies and fixing vulnerabilities.
- Used AI (Claude Code, Copilot) to orchestrate AngularJS-to-React migration, creating PRDs, implementation tasks, and tests.

Part-time React Developer | Binbooker

Vancouver Canada (Remote) | Mar 2025 – July 2025

- Improved various parts of the [BinBooker](#) app using React and SCSS for a smoother, easier user experience.
- Implemented advanced filtering and reporting features, enabling users to analyze operational data more efficiently.
- Optimized the Bins Management page, significantly improving performance when rendering large datasets.
- Enhanced Stripe integration reliability and added a system-wide maintenance mode to support safer deployments.

Full Stack Developer | Evelan GmbH

Hamburg, Germany (Remote) | Aug 2023 – Jan 2024

- Contributed to [PAUL 360](#), a secure document collaboration platform.
- Built response and reusable UI components using React and Chakra UI.
- Developed type-safe APIs using Next.js and tRPC for efficient end-to-end data flow.
- Create unit tests using Jest to improve core logic reliability.
- Designed and optimized scalable PostgreSQL schemas with Prisma.
- Implemented shared validation with Zod across client and server to ensure data integrity.
- Participated in PR reviews to maintain consistent architecture and code quality

Software Engineer | Beyonder Inc.

Makati Philippines | Feb 2022 – July 2023

- Built full-stack web/mobile apps with TypeScript, Next.js, React, React Native, Node.js, MongoDB, Firebase and Supabase.
- Implemented CI/CD pipelines using GitHub Actions, reducing manual deployment steps.
- Translated requirements into Figma prototypes for design alignment.
- Delivered multiple client-facing products ([Kokuban](#) (MVP), [スマホ de マップ](#), [Doko?](#)).
- Led frontend initiatives, mentoring junior developers and promoting consistent development standards across projects.

EDUCATION

Bachelor of Science in Information Technology | STI College Alabang

June 2019 – July 2023

TECH STACK

- **Frontend:** JavaScript, TypeScript, React, React Native
Next.js, Tailwind CSS, SCSS, Vite, ESLint, Prettier, Biome
- **Backend:** Node.js, Express, Python, Django, OAuth, REST
- **Dev Tools:** VS Code, Git, GitHub, GitLab, BitBucket, Claude Code, Codex, OpenCode, Copilot
- **Database:** PostgreSQL (Supabase, Neon), SQLite, MongoDB
- **Other Technologies:** Turborepo, Prisma, tRPC, Vercel, GitHub Actions, Firebase, Sanity CMS, OpenRouter, OpenAI, Vercel AI SDK, Docker

PROJECTS

- [PlayLater](#) - Offline-first mobile hub to save YouTube, Netflix, and other streaming content with one-tap playback.
- [Rezumer](#) - AI-assisted resume builder that lets users draft, refine, and tailor resumes, with AI-powered optimization, job-description matching, and a context-aware assistant.
- [Zomink](#) - Link management platform to create, track, and shorten URLs with custom aliases.
